

# UNITED STATES DEPARTMENT OF JUSTICE

BUREAU OF NARCOTICS AND DANGEROUS DRUGS  
WASHINGTON, D.C. 20537

## COMPREHENSIVE LIST OF DACA DRUGS

This Comprehensive List of DACA Drugs has been compiled by the Bureau of Narcotics and Dangerous Drugs, Department of Justice. The listing includes - in alphabetical order - trade names, non-proprietary names, chemical names and synonyms of DACA controlled drugs. Products covered are single stimulant, depressant and hallucinogenic drugs, as well as combination products. In parentheses after each trade name is the name of the manufacturer.

Combination products submitted to the Bureau with a request for an exemption and for which exemption was denied are denoted by a bullet (.). Products without a bullet are considered to be covered under the Drug Abuse Control Amendments of 1965.

All drugs in this list are now covered by all DACA regulations - including recordkeeping provisions and the limitation on the prescription order of six months and five authorized renewals.

The Justice Department is still considering the status of chlordiazepoxide and its salts (Librium) and diazepam (Valium). The Department has postponed the effective date of the final order listing meprobamate under the 1965 Drug Abuse Control Amendments, pending the outcome of the petition filed by Carter-Wallace in the U. S. Court of Appeals for the Fourth Circuit in Richmond, Virginia.

This listing now supersedes all previously published listings of DACA controlled drugs.
